10" Talalay Gel Latex - Visco Memory Foam Mattress

Spring-Free Mattress made of 7" of 1.9 lb open-cell foam, topped with 1" of Talalay Latex and 2" of BreeZZy cool open cell gel memory foam.

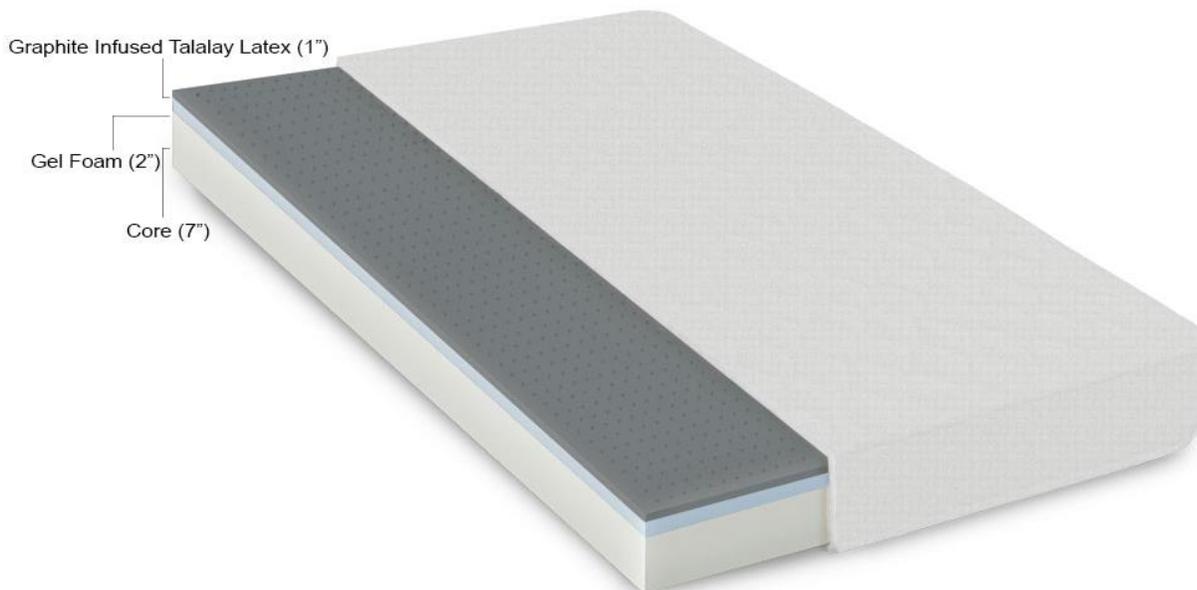

The natural biodegradable Talalay Latex delivers a buoyant quality and relieves pressure to provide a great sleep. The Gel infused in the Latex provides a natural cooling effect that wicks heat away from the body and absorbs heat energy released from the body.

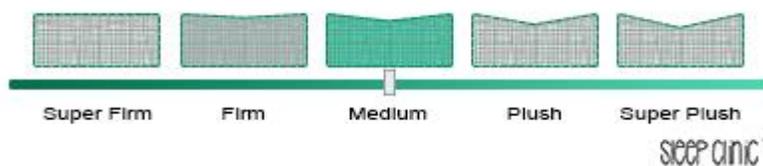

Sustainability: Just like you, we care about our planet. That is why all of the Polyurethane Foams we use are made using BioPlush Technology, which means, a maximum possible portion of the fossil-based oil used in manufacturing is replaced with soy-based oils such as soybeans. For the Talalay Latex also, the ingredients are natural and biodegradable and come from renewable sources.

10" Talalay Graphite Latex - Visco Memory Foam Mattress

Spring-Free Mattress made of 7" of 1.9 lb open-cell foam, topped with 1" of Talalay Latex and 2" of BreeZZy cool open cell gel memory foam. The natural biodegradable Talalay Latex delivers a buoyant quality and relieves pressure to provide a great sleep.

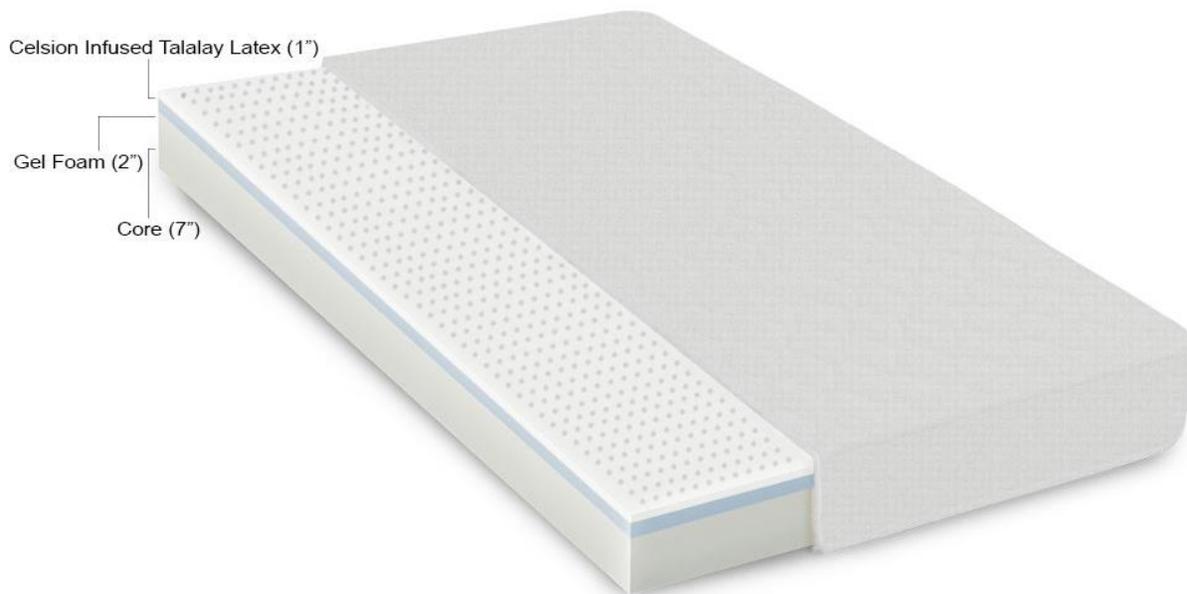

- Natural Mineral with inherent heat wicking properties helps create a Fire Retardant char barrier. Graphite itself is non-absorbent which helps the mattress stay “cool” and stay “dry”.
- Heat resistant, non-absorbent and inherently non-magnetic

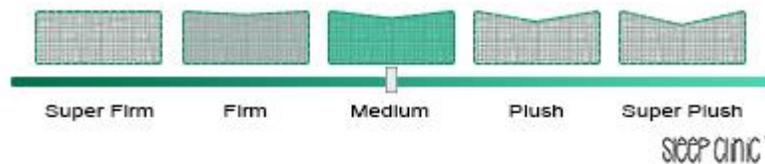

Sustainability: Just like you, we care about our planet. That is why all of the Polyurethane Foams we use are made using BioPlush Technology, which means, a maximum possible portion of the fossil-based oil used in manufacturing is replaced with soy-based oils such as soybeans. For the Talalay Latex also, the ingredients are natural and biodegradable and come from renewable sources.

10" Talalay Celsion Latex - Visco Memory Foam Mattress

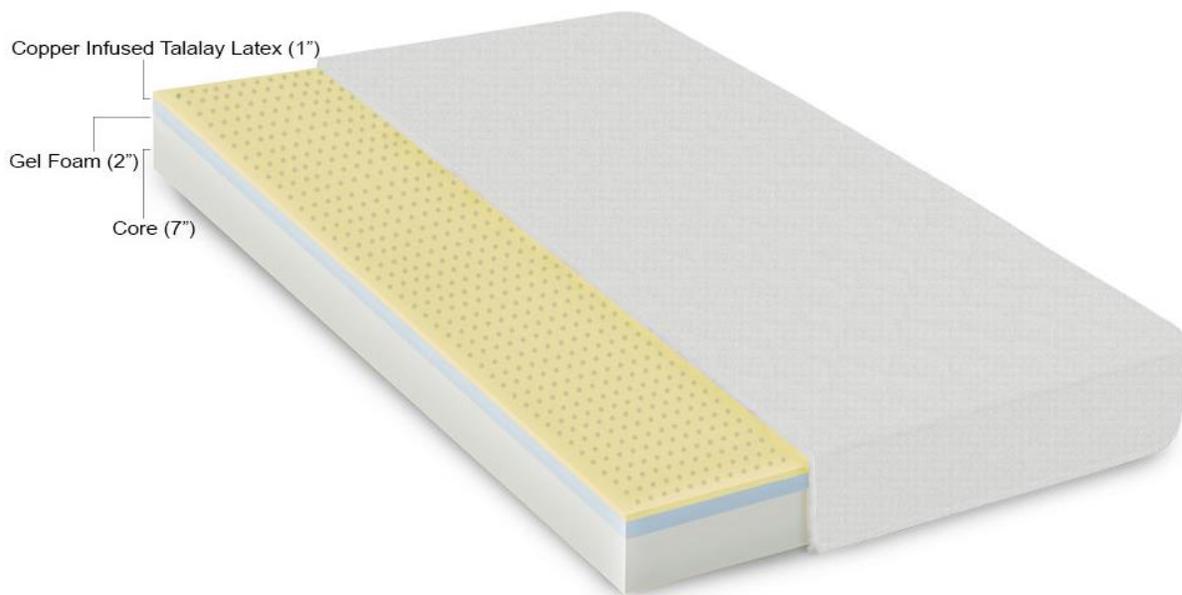

- Sleep at the ideal temperature zone
- Celsion absorbs and releases heat energy released from the body as your temperature varies.
- Most consistent cell structure provides unmatched durability and breathability
- No turning or flipping necessary: Consistent feel from top to bottom
- Inherent Antimicrobial properties built in to protect each mattress inhibiting the growth of bacteria, mold, and mildew, safe for babies and allergic people

A quality mattress with a top layer that combines all characteristics of Celsion and Latex, a transition layer made of our innovative BreeZZy Cool Gel Memory Foam, and a soy-based open-cell core to ensure you have the proper support during your sleep. The top latex layer provides you with a buoyant, sleeping surface which feels soft yet supportive. Talalay Latex is made of the natural rubber tree and is 100% natural. The Talalay Latex we use is Oeko-Tex Class 1 Certified, the highest possible rating in being free from harmful substances. This means it is safe even for babies. Now imagine all the Talalay Latex greatness infused with Celsion!

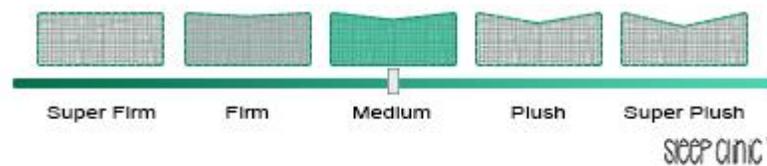

10" Talalay Copper Latex - Visco Memory Foam Mattress

- Anti-inflammatory
- Encourages pigmentation and coloration + creation of red blood cells
- Prevents premature aging
- Brain Stimulation
- Defends against infection (can inactivate antibiotic-resistant strains, such as RSA)
- Helps utilize iron and sugar (Essential in creating connective tissue)
- Reduces bad cholesterol
- Ensures healing of wounds

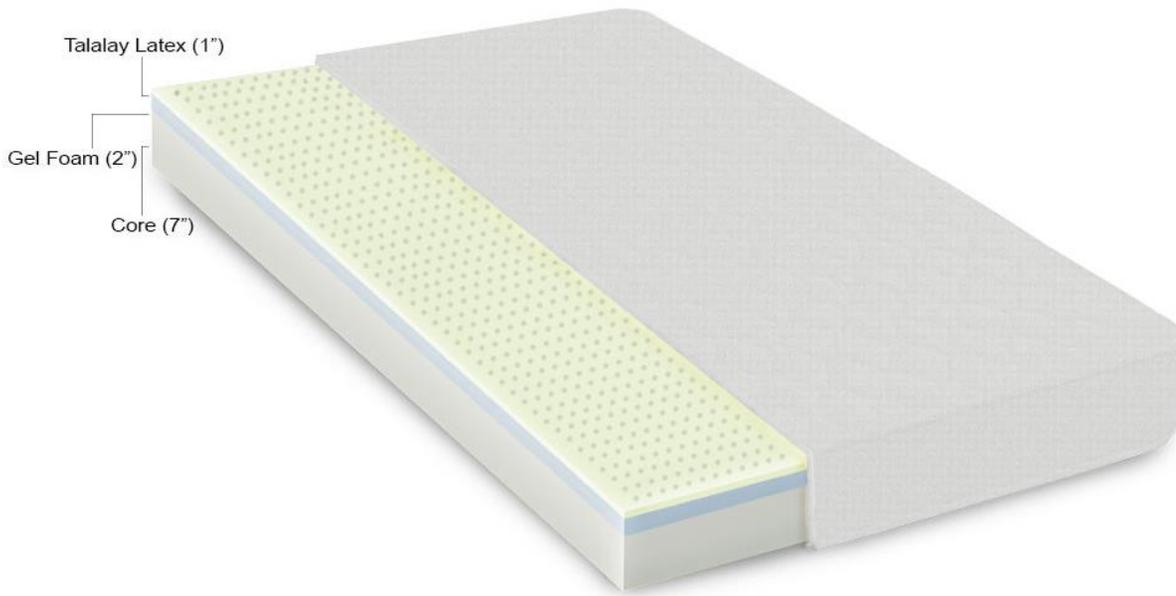

Copper is popular as a natural pain management element which helps to relieve arthritis, joint pains, RSI and fatigue. Also, copper is known to be biostatic, so bacteria cannot grow on it.

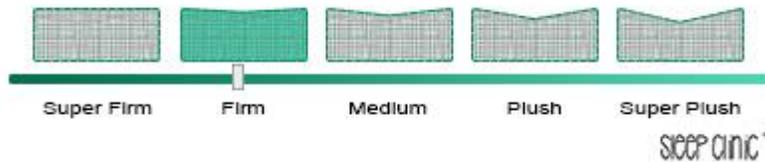

The top latex layer provides you with a buoyant, sleeping surface which feels soft yet supportive. Talalay Latex is made of the natural rubber tree and is 100% natural and free from harmful substances! Now imagine all the Talalay Latex greatness infused with copper!

10" Talalay Latex - Visco Memory Foam Mattress

Spring-Free Mattress made of 7" of 1.9 lb open-cell foam, topped with 1" of Talalay Latex and 2" of BreeZZy cool open cell gel memory foam. Natural biodegradable Talalay Latex delivers a buoyant quality and relieves pressure to provide a great sleep.

Sustainability: Just like you, we care about our planet. That is why all of the Polyurethane Foams we use are made using BioPlush Technology, which means, a maximum possible portion of the fossil-based oil used in manufacturing is replaced with soy-based oils such as soybeans. For the Talalay Latex also, the ingredients are natural and biodegradable and come from renewable sources.
